

## Our Mission

**WSOMS is a voluntary partnership of dental professionals working together to improve the quality of oral and maxillofacial surgery services in the community. It is the belief of the Society that professional, political, social and economic exchange between states of the Sixth District of the AAOMS will result in a unity of voice which will enhance our effectiveness in our community and at the national level.**

When patients come into the dental office to discuss a dental implant, their first concern is what will their smile look like. Not only does the **Gingival Cuff Links System** eliminate the patient's concerns about

esthetics, but it also assists the practitioner with papilla and bone graft retention. **Gingival Cuff Links** reduces the need for repeat surgical interventions and exposure to infections, time well saved in the practitioner's schedule to treat more patients. The **Gingival Cuff Links** provisional healing cuff arrives pre-contoured in 11 shapes to fit any tooth in the mouth and consists of materials used daily in dental practices. A completely alterable chairside solution, the **Gingival Cuff Links System** is easy to use, affordable and compatible with most major implant systems.

THE GINGIVAL CUFF LINKS SYSTEM IS MANUFACTURED IN THE USA BY GCL SYSTEMS, INC. VISIT [GCLSYSTEMS.COM](http://GCLSYSTEMS.COM) OR CALL TOLL FREE 833-425-4346 FOR MORE INFORMATION.

**Thank-you Western BBQ Patron Sponsor, OMSNIC!**

Visit the Beer Burro 6 to 8 PM!

## TUESDAY, MARCH 12

**7:00am - 8:00am**

Breakfast with the Exhibitors (family/guests welcome): Pueblo Room I

**8:00am - 12 noon, DR. ALAN HERFORD**

New Technologies: Pueblo Rooms II to IV

**12 noon Adjournment**

**Harold L. Crossley, D.D.S., M.S., Ph.D.**

## Pharmaceutical and Street Drug Abuse

**Dr** Harold Crossley DDS MS PhD, is an internationally recognized expert in the clinical pharmacology of dental drugs. We were lucky to score time in his schedule as he is in high demand.

## Bio

Dr. Crossley is Professor Emeritus at the University of Maryland Dental School. A native of Rhode Island, Dr. Crossley received a Bachelor of Science degree in Pharmacy from the University of Rhode Island in 1964. He later was awarded the Master of Science (1970) and Doctorate degrees (1972) in Pharmacology. The University of Maryland Dental School in Baltimore awarded Dr. Crossley the D.D.S. degree in 1980. The liaison between the classroom and his part-time dental practice produced a practical approach to understanding the pharmacology of drugs used in the dental office.

Dr. Crossley has co-authored many articles and four books, Drug Information Handbook for Dentistry, dealing with a variety of topics within the field of pharmacology. Other areas of expertise include the pharmacology of street drugs and chemical dependency. He serves on the Maryland State Dental Association's Well-Being Committee, is an active member of Phi Kappa Phi, Omicron Kappa Upsilon Honorary Dental Society, the American College of Dentists, International College of Dentists and is an honorary member of the

# PRESENTATION

Thomas B. Hinman Dental Society. He was the recipient of the 2008 Gordon Christensen Lecturer Recognition award presented by the Chicago Dental Society and the recipient of the 2012 Award of Distinction presented by the Academy of Dentistry International for his efforts in Continuing Dental Education. He has been a consultant for the United States Drug Enforcement Administration and other law enforcement agencies since 1974. Drawing on this unique background, Dr. Crossley has become nationally and internationally recognized as an expert on street drugs and chemical dependency as well as the clinical pharmacology of dental drugs.

## Course Description

What questions should I be asking my patients to avoid drug interactions with street drugs? What is the impact on my practice of the recent resolutions, approved by the American Dental Association, for providing dental care for patients who are and/or have been chemically dependent? What are some of the oral manifestations of street drug abuse? How will I know if a person is under the influence of street drugs? What are the characteristics of and how do I manage the "doctor shopper"? Do I have to take any precautions with the dental patient who is under the influence? Why is it so important that the dental staff be knowledgeable about street drugs? Why am I at risk? What are some characteristics of adolescent substance abuse and what do I do about it?

The dental team is in a unique position providing dental care to a patient population that may be regular users or experimenting with mood altering drugs. This dynamic, brutally honest, and graphic presentation will take you from the streets and into the office to help you identify and manage the substance abusing patient. Discussion includes the origins, types, mechanisms of action, and signs and symptoms of commonly abused prescription and illicit drugs.

## Course Description

At the conclusion of this course, you'll:

- Recognize the signs and symptoms of commonly abused prescription and illicit drugs in patients and adolescents.
- Know which medications to avoid with the suspected drug abusing patient.
- Recognize and manage the doctor shopper.
- Manage the chemically-dependent patient.
- Describe "meth mouth", "lean", "whippets", "parachuting", "bath salts", "Spice Diamond, Spice Gold" and more.
- Understand how your kid can get intoxicated on hand sanitizer.
- Answer the questions "Is marijuana addicting?" and "Does marijuana have medical properties?"
